

Lecture 0: Test

Sample Formats, Code Block, and Visualization

Chawin Ophaswongse, Ph.D.

2103304 Automatic Control I (Fall 2026)

Department of Mechanical Engineering
Faculty of Engineering, Chulalongkorn University

Hello! Welcome to the course!

1 Dummy Section

- dummy subsection
- Root Locus Example
- Diagram Example

Lecture Outline

1 Dummy Section

- dummy subsection
- Root Locus Example
- Diagram Example

Sample frame title

In this slide, some important text will be highlighted because it's important.
Please, don't abuse it.

Remark

Sample text

Important theorem

Sample text in red box

Examples

Sample text in green box. The title of the block is "Examples".

Sample frame title

In this slide, some important text will be highlighted because it's important.
Please, don't abuse it.

Remark

Sample text

Important theorem

Sample text in red box

Theorem (hello)

$$a^2 + b^2 = c^2$$

Examples

Sample text in green box. The title of the block is "Examples".

Two-column slide

This is a text in first column.

$$E = mc^2$$

- First item
- Second item

This text will be in the second column and on a second thought this is a nice looking layout in some cases.

Root Locus Plot

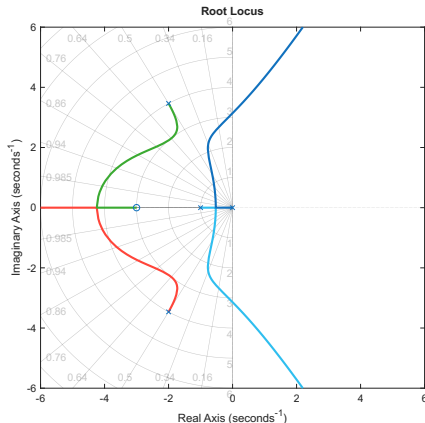

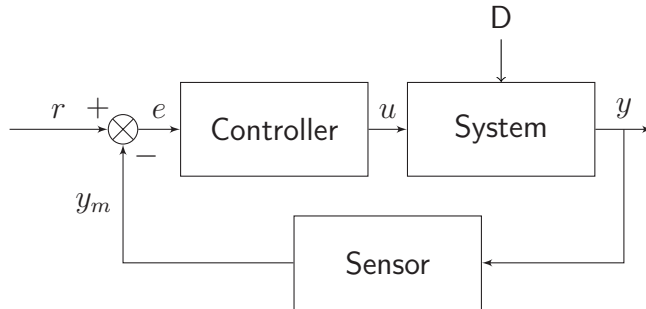

Figure: Enter Caption

Root Locus Plot of

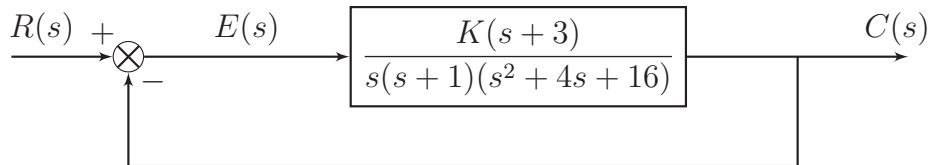

$$G(s) = \frac{K(s+3)}{s(s+1)(s^2+4s+16)}$$

```
1 % sample matlab code
2 a = [1 1 0]; s = 'abcd';
3 b = [1 4 16];
4 den = conv(a,b); num = [1 3];
5 rlocus(num, den);
6 v = [-6 6 -6 6]; axis equal;
7 axis(v);
8 grid on;
9 !mv test.txt test2.txt
10 A = [1, 2, 3;... foo
11      4, 5, 6];
12 s = 'abcd';
13 for k = 1:4
14     Disp(s(k)) % bar
15 end
16 x = linspace(0,1,101);
17 y = x(end:-1:1);
```

Basic Anatomy of Control System

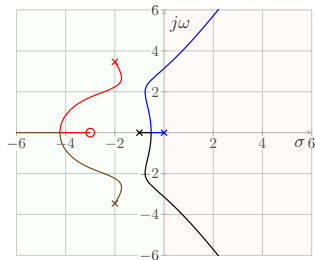

Frame Title

Root Locus Plot

Root Locus Plot of

$$G(s) = \frac{K(s + 3)}{s(s + 1)(s^2 + 4s + 16)}$$

This slide has intense animations and will ONLY appear in the presentation. It will be completely skipped in handout mode.
